## PROFILE

Motivated junior web developer skilled in HTML, CSS, and JavaScript, with a proven track record of building responsive, high-performance web applications. Experienced in troubleshooting bugs and optimizing websites for mobile and desktop. Proficient in Git and delivering technical presentations. Eager to contribute with a passion for delivering user-friendly solutions.

## EXPERIENCES

### Portfolio Website

2024 - PRESENT

- Developed an intruder detection system using Raspberry Pi, capturing images upon unknown faces.
- Hosted a local web server using Django framework on Raspberry Pi OS to display intruder images.
- Implemented frontend with HTML, CSS, and JavaScript, and backend with Python and MongoDB for data storage.

### Portfolio Website

2024 - 2025

- Developed (paiforlio.netlify.app) a responsive portfolio website using HTML5, CSS3, and JavaScript, optimized on mobile and desktop devices.
- Implemented responsive layouts with pure CSS ensuring cross-browser compatibility(Chrome, Firefox, Safari).
- Utilized **Git** for version control, managing code updates via **GitHub**, and deployed the site on Netlify for fast, reliable hosting.

### CRUD Blog Website

2024 - 2025

- Built a dynamic CRUD blog website using HTML, CSS, JavaScript, and Laravel with MySQL, enabling post creation, editing, and deletion.
- Designed responsive interfaces with CSS and Bootstrap, ensuring seamless functionality across mobile and desktop platforms.
- Troubleshoot and fixed bugs, including form validation errors and database query issues, to ensure reliable performance.
- Managed project updates with Git and GitHub, maintaining a clean and organized codebase.
